Visitor Management System and Software

Provides a professional solution for visitor screeni documentation and photo ID pass.

EITS - Available Modules

- ◆ Stand Alone
- ◆ Web Based
- ◆ Mobile App (Smart Phone based)
- ◆ Kiosk (Self Operative)

Embassy IT Solutions have developed a simple, perfect and secured Visitor Management Software for Corporate, Industries, Modern Organization, Research Centres and for multiple tenants like Tech park, Business Centres, Commercial complex, campus and residential complexes, which provides a secured and effective way to manage visitors at your facilities.

How Visitor Management System Works

- An image of the visitor's is taken through a camera at the entrance
- The reception or security personnel enter the details of the visitor is displayed
- The visitor's photograph and ID proof details are saved to database, which helps in generating a visitor pass. A display of the same can be reviewed in the monitor.
- A Visitor Pass with photo is generated along with barcode and visitor's details and printed using ink jet printers.
- Information / message are sent via E-mail and / or SMS to the officers / employee's PC and, by sending visitor's details & photo, and wait for his approval.
- Officer decides to meet or forward or refuse the appointment or ask to wait (in Mobile and web based).
- A Security Alert is sent to the Security Officer if the visitor is hanging around after his meeting.
- Real time Monitoring of number of visitors in organization.
- Various reports as per customer requirements.
- Visitor's detail data appears in an easily – sortable database, rather than traditional handwritten log book which is difficult to read.

Benefits of Visitor Management System

- Improved Safety and More Professional Image
- Visitor's record with Photo identity.
- Monitoring movement of visitors in the organization.
- Access Control for visitors in the organization.
